|-------------------------|--------------------|
| Client | GKN Aerospace |
| Project Title | Estates FM Review |
| Client Sector | Industrial |
| Service Provided | Procurement Advice |

Our Role

Following a detailed review of the existing historical data, a full update was produced providing comprehensive asset data, planned preventative maintenance schedules, ppm programme, helpdesk and maintenance management software requirements, reactive maintenance requirements and performance measurement reporting system. Provelio recommended appropriate tender documentation, form of contract and payment mechanisms, managing the procurement process from initial strategic assessment through to the appointment of the preferred supplier.

Client Benefits

Provelio's early advice and ongoing involvement has allowed GKN to undertake a rationalisation of the way in which maintenance is carried out throughout their Estate. By adopting an industry standard form of contract, using carefully drafted tender documentation and practical delivery procedures, together with appropriate levels of compliance monitoring, GKN are able to deliver an efficient, compliant and cost effective service to support their core business activities.
