Management Services in Estates and Construction

Top Tip Number 2...

Top Tip # 2: Photovoltaic Solutions - money for nothing?

Photovoltaics is a method of generating electrical power by converting solar radiation into electricity, through solar panels.

If you have a large estate or available land photovoltaics could be ideal for you.

Provelio have the experience and expertise to assist clients in assessing and progressing Photovoltaic Schemes. We can help clients identify the key issues they need to consider and the benefits to be gained from implementing such a scheme.

Key Benefits:

- Indexed linked income for 25 years
- Income from exported electricity
- Revenue savings through use of generated electricity
- Investment Business Case payback analysis
- Reduced impact of energy price rises, expected above inflation
- Contribution to organisations' cost reduction plans

How Can We Help?

Provelio have developed a step by step process map that can assist both Estates and Finance decision makers through the procurement of Photovoltaic systems. The process covers:

- Development of Outline and Full Business Cases including financial assessments
- Production of necessary technical evidence
- Identification and management of legal and planning issues
- Identification of procurement options and management of the process
- Implementation of the scheme

Benefits of Using Provelio

- Efficient and detailed process that will allow the client to make an informed decision
- Management through entire process
- Provide key links with industry experts
